

valve**COSY**®

INSULATING COVER FOR YOUR
HOT WATER SERVICE VALVE

features

- ✓ Save money
- ✓ Reduce heat loss
- ✓ Conserve energy

Easy, quick
DIY installation.
Choose Valvecosy™
to safely insulate
your hot water
service valve.

- Easy removal of **Valvecosy™** to facilitate inspection of valve
- Covers and enables positioning of easing gear at various orientations
- Fits most 12mm and 19mm valves
- Covers valve and pipe unions to reduce heat loss
- Drainage channel enables water to drain from the cover which may indicate leaks. It also maintains dryness within the **Valvecosy™** insulator
- Helps hot water service installations comply with AS/NZS 3500.4. Don't get caught without insulation in an audit.

Covers auxilliary relief valve. If valve releases boiling water it is directed downward and at the tank, not into the surrounds

Covers entire valve reducing heat loss

Simple installation by one person. No tools or additional materials required
